Be-SAFE as whole

BE-SAFE is a European project, funded by the European Commission and the Swiss State Secretariat for Education, Research and Innovation.

Rationale

Benzodiazepine and sedative hypnotics (BSHs) incur significant adverse effects and costs, especially in older adults. Addressing BSH overuse in older adults is therefore an urgent priority to improve patient safety in Europe. However, previous attempts did not lead to large-scale reduction in use.

The goal of BE-SAFE is to improve patient safety by addressing knowledge and practice gaps related to the reduction of BSHs used for sleep difficulties in Europe.

A major task of BE-SAFE is to inform the various audiences, including patients, informal carers, health care professionals, academics, system leaders and decision makers. The project website is the major communication tool to inform the various stakeholder groups.

BE-SAFE public website

The BE-SAFE website will house a toolkit and be interactive and searchable so that individualised customisable information can be generated. The project structure, the consortium and boards are presented, public deliverables will be available for download. There will also be plain language information for the general public.

On the welcome page, the various stakeholders can access individual areas with dedicated information material. A BSHs Facts and Opinions banner attracts the attention and creates awareness for the project goal.

The information is provided in English and will gradually be made available in French, Norwegian, Greek, Polish, Spanish and German.

A direct link is given to [Choosing Wisely International](#) (CWI), the BE-SAFE networking partner.

Website structure and information offer

About Be-SAFE

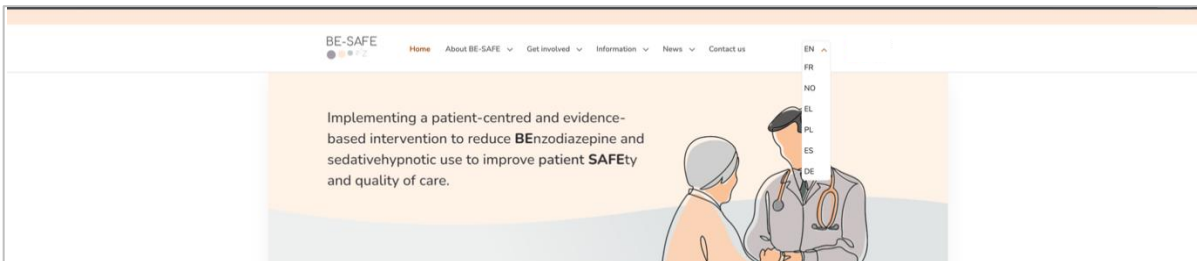

Be-SAFE explains the novel concept, and presents its structure, the project partners and the involved board members.

BE-SAFE News

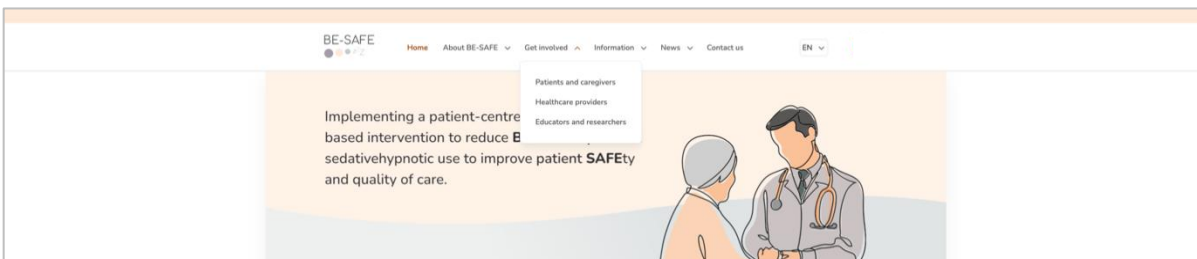

The BE-SAFE Newsletter will be released from project mid-term. Information on partnering projects will be listed and linked to the related projects.

BE-SAFE – in Europe

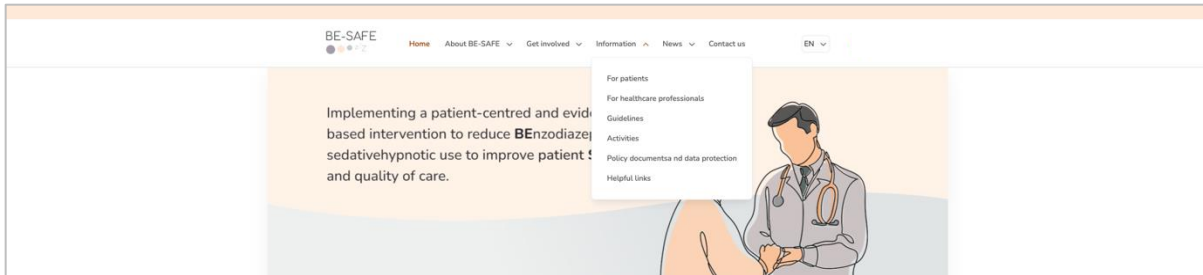

BE-SAFE study will be implemented in six European countries. Therefore, the project will provide information in the related languages, beside English language.

BE-SAFE for stakeholder groups

BE-SAFE results will be relevant to a wide audience, including patients, informal carers, health care professionals, academics, healthcare system leaders and decision makers. BE-SAFE addresses the various stakeholder groups via dedicated website areas.

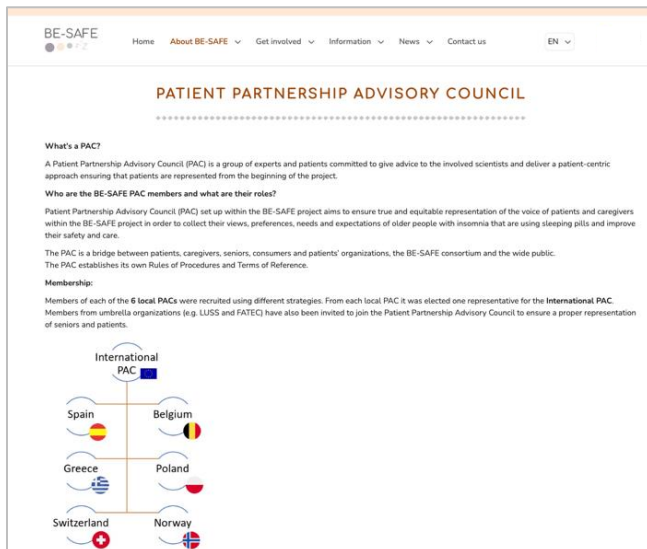

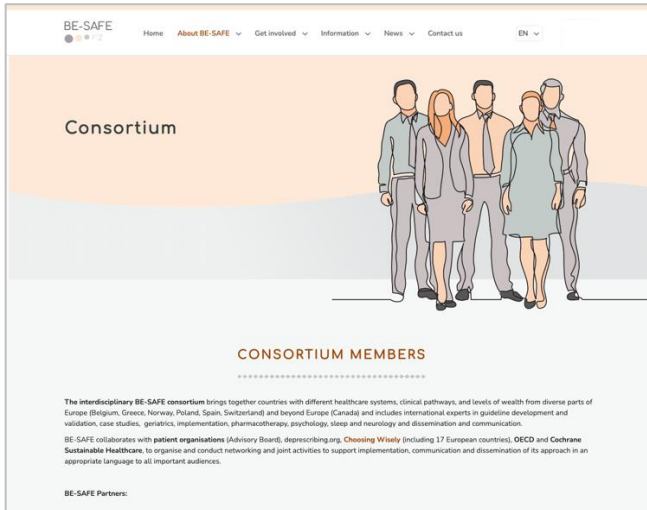

BE-SAFE information materials

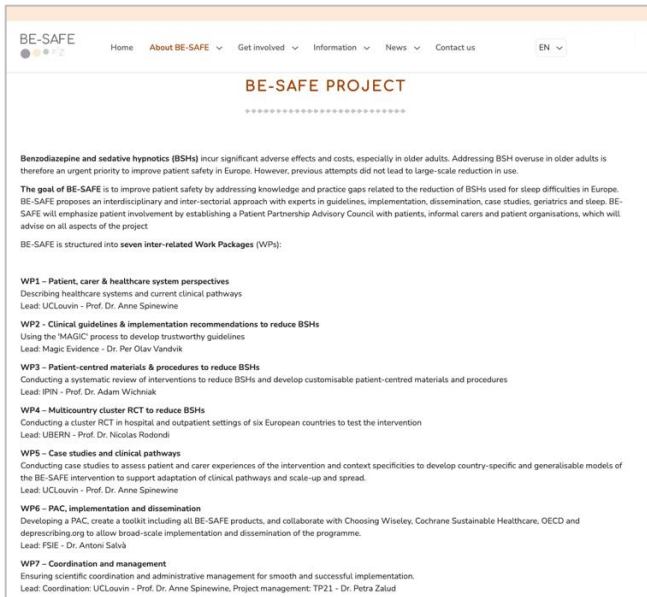

BE-SAFE collaborates with patient organisations, Choosing Wisely International (CWI), OECD, deprescribing.org and Cochrane Sustainable Healthcare and conducts network and joint activities to support implementation and dissemination to all important audiences.

BE-SAFE will provide targeted resources for patients, health care professionals, healthcare systems and health policymakers throughout the diverse healthcare landscape across Europe to reduce BSH use threatening patient safety. These resources will be found on the BE-SAFE website.

BE-SAFE Implementation

BE-SAFE presents in detail the concept, the Work-Package structure, public deliverable reports as well as the partners and advisory boards that will implement the project.

Legal issues

Finally, BE-SAFE acknowledges the funding received by the European Commission and the Swiss State Secretariat for Education, Research and Innovation. Furthermore, the website explains how GDPR rules are considered and presents a formal disclaimer.

BE-SAFE is implemented by a European consortium:

- Université catholique de Louvain (BE) - coordinator
- Institute of Psychiatry and Neurology (PL)
- Fundacio Salut i Envelliment (ES)
- Magic Evidence (NO)
- Oslo University Hospital (NO)
- University of Athens (GR)
- Universität Bern (CH)
- tp21 GmbH (DE).

BE-SAFE collaborates with patient organisations, Choosing Wisely International (CWI), OECD, deprescribing.org and Cochrane Sustainable Healthcare and conducts network and joint activities to support implementation and dissemination to all important audiences.
